

# Our mission of local community solar is our passion.

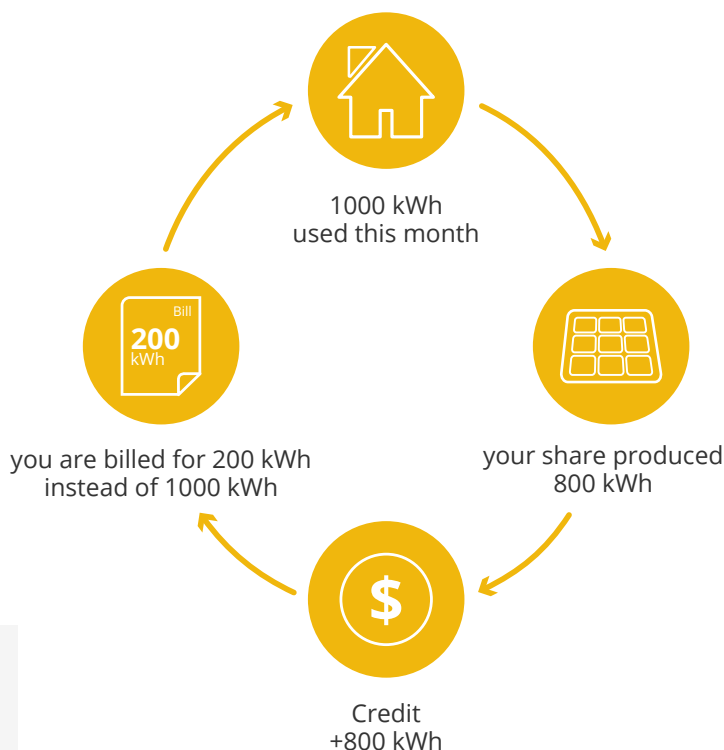

Setting the standard of quality for next generations

## Getting to know: Community Solar

Community solar is green electricity for the community! Instead of the solar farm creating revenue by selling the energy to the utility, local residents and businesses buy the energy through a subscription. People subscribe to the energy created in the solar farm that offsets the mixed power used at their home.

### Community Solar: How it Works

- 1 You sign up for a share based on your usage / or project availability.
- 2 Your contract states your benefits: Lower Cost Green Electricity, Local Investment, and Environmental Impact.
- 3 Your Share produces a certain amount of kWh Monthly
- 4 It is credited to your monthly bill with CMP or Versant, and deducted as if it was on your roof or site.

### What are some of the **benefits?**

-  Hassle-free solar savings
-  No installation or maintenance required
-  No long-term contracts
-  Accessible to all regardless of roof ownership
-  Support renewable energy throughout your community
